SERISS (Synergies for Europe's Research Infrastructures in the Social Sciences) aims to exploit synergies, foster collaboration and develop shared standards between Europe's social science infrastructures in order to better equip these infrastructures to play a major role in addressing Europe's grand societal challenges and ensure that European policymaking is built on a solid base of the highest-quality socio-economic evidence.

The four year project (2015-19) is a collaboration between the three leading European Research Infrastructures in the social sciences – the European Social Survey (ESS ERIC), the Survey of Health Ageing and Retirement in Europe (SHARE ERIC) and the Consortium of European Social Science Data Archives (CESSDA AS) – and organisations representing the Generations and Gender Programme (GGP), European Values Study (EVS) and the WageIndicator Survey.

Work focuses on three key areas: Addressing key challenges for cross-national data collection, breaking down barriers between social science infrastructures and embracing the future of the social sciences.

This deliverable was intended to provide the social science community with information and resources on data management. To have the widest reach, all the talks are provided in an online video format, either via a webinar or a recording of the live lectures. The videos and lecture slides have been archived for reuse and preservation.

The archived materials can be found here:

3) **SERISS Workshop - Legal and ethical issues regarding data collection from a researcher's point of view. Delivered by Alexandra Stam FORS Anne-Mette Somby NSD 15.07.2019**

The workshop took place as a side-event during the European Survey Research Association (ESRA) conference in Zagreb, on 15 July 2019 and had 37 attendees. Positive feedback was received, especially from participants attending from the Croatian national data archive.
